Clinical practice

Reaching out for a higher level of knowledge and treatment of wounds: how to get there?

To gain knowledge and have a high quality of practical skills in wound care is a challenge. The experience in clinical practice is that the basic nurses have a lack of self-confidence when performing wound care, as well as a lack of skills. These challenges have grown bigger over a number of years, and action is needed. To deal with the challenges, Odense University Hospital, Denmark, has developed a blended learning concept in wound care. The concept contains an e-learning module combined with a 2-day study visit in a department of wound healing. A third part of blended learning is four to six meetings with different themes. The meetings contain workshops and walk through different cases. This paper aims to present an overview of the wound care challenges in clinical practice, as well as possible solutions to those challenges.

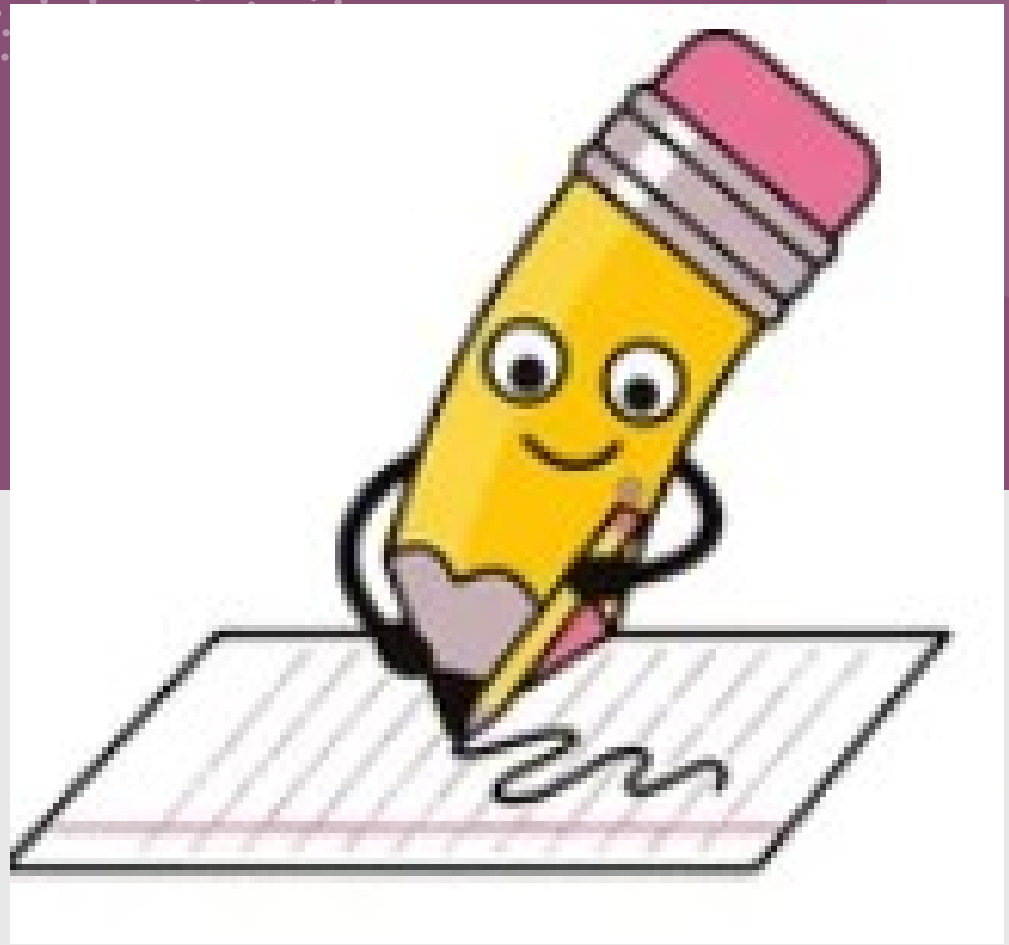

Does e-learning have an effect on gaining increased knowledge and better treatment in wound care?

Rammerne og starten på undersøgelsen

Selve undersøgelse

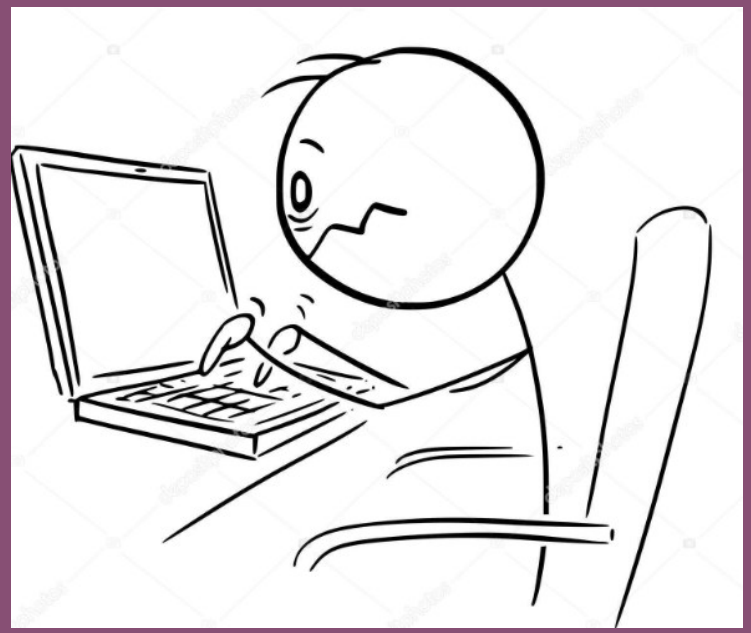

- Spørgeskemaet
- 2020-2024
- begrænsninger

Formålet med artiklen

- udgivet I wound international
- løfte vidensniveau i egen afdeling
- Vidensdeling med andre

Processen:

- En lang og svær proces
- Frem og tilbage mange gange
- Tid og sammehæng

Resultater

	Hvad skal du have fokus på ved mekanisk oprensning af diabetiske sår?	Korrekt svar 1: 86% (1) vs. 91% (3) Korrekt svar 2: 84% (1) vs. 84% (3)
TIME	Hvad er TIME?	Korrekt svar 88% (1) vs. 91% (3)
Sårprodukter	Hvad anvendes produktet jelonet til?	Korrekt svar 58% (1) vs. 59% (3)
	Hvad betyder forkortelsen Ag?	Korrekt svar 81% (1) vs. 91% (3)
	Hvad anvendes superabsorbant, fx vliwasorb til?	Korrekt svar 88% (1) vs. 94% (3)
	Hvad kan en brugt forbinding sige noget om?	Korrekt svar 1: 100% (1) vs. 100% (3) Korrekt svar 2: 84% (1) vs. 94% (3) Korrekt svar 3: 84% (1) vs. 69% (3)

Resultater

Table 3: Example 1 of factual wound question

Questions	Measurement 1	Measurement 3	Difference
Where does a venous leg ulcer typically occur?	Right answer 79%	Right answer 88%	9%

Table 4: Example 2 of factual wound question (multiple right answers)

Questions	Measurement 1	Measurement 3	Difference
Why is it important to prevent infections in people with diabetes?			
• Right answer 1	93%	100%	7%
• Right answer 2	95%	94%	-1%
• Right answer 3:	98 %	100%	2%

Table 5: Example of question regarding respondents' own perception of their knowledge

	Question: To what extent do you feel that you have the knowledge to perform wound care? (Including looking after wounds, cleaning, choosing a bandage)				
	Not at all	Very low degree	Some degree	High degree	Very high degree
Measurement 1	0%	30%	47%	19%	5%
Measurement 3	0%	12%	64%	24%	0%
Difference	0%	18%	17%	5%	-5%

Konklusion

- Hands on
- Basis viden
- Kan ikke stå alene
